% # ' Moreover the architects of the Dialogue were clear that these discussions between IUCN and ICMM would not directly bring about or force through changes; neither organization had the mandate or means to do so. The idea was that the Dialogue would find the foundation and space in which such changes might take place. In this regard the Dialogue did contribute to the development of the Good Practice Guidance which offers tools for companies seeking to improve their performance on biodiversity conservation. The Guidance provides a basis point of departure or reference for efforts to assess and ensure performance improvements of the in

FUTURE OPTIONS

APPEN

Mining industry participation and support for strengthening IUCN's Protected Areas Management Categories System

Providing support for issues related to mining biodiversity such as involvement of indigenous people and local communities, restoration of ecology sites and prior informed consent

- What were some of the key issues NOT addressed? Why? Did it matter?

3. DIALOGUE OPERATIONS

- To what extent has the Dialogue been effectively organized and led?
- How are the different roles & responsibilities shared in the Dialogue?
- How are decisions made with regard to your involvement? In what ways are you involved in decision making and planning? And to the products and services generated through the Dialogue?
- How do you work together for proposing, designing and implementing Dialogue products and services? What are the processes and dynamics involved?
- How would you describe the influence of power in the Dialogue?
- What would you change in the way the Dialogue is organized?
- How has your involvement been resourced?
- How do you feel this has affected your contribution to the Dialogue?
- Do you think the Dialogue is sufficiently resourced? How should it be resourced in the future?
- What organizational lessons can be drawn for organizing other Dialogues? Let's learn from conservation and industry groups.
- What's out there? Understanding and capacity building? How do you support each other in that?
- If we said that there were stages of development of a relationship like this, which stage would you say you're in?
 - a. Scoping, building and planning
 - b. Implementing, managing and maintaining
 - c. Reviewing and revising
 - d. Sustaining

Secretariat Specific questions only.

- What involvement?

4. BENEFITS OF THE DIALOGUE

- What have been the main benefits or value added of the Dialogue for your organization? For you personally? For the mining industry? For biodiversity conservation? For the conservation community?
- Could the benefits attributed to the Dialogue have been achieved in another way? If so, how?
- Can you think of times when the Dialogue faced real problems? How was it dealt with? How did the partners respond?
- Do you think there are risks to your cooperation?
- Do you perceive your cooperation situation as mutually beneficial or is one cooperating partner benefiting more than the other others?
- In your opinion, how does this affect possible futures for the Dialogue?
- What do you think will be the long-term benefits of your cooperation?
- How effective do you feel the Dialogue has been?
 - As cooperation?
 - At achieving your joint objectives?
 - Why/why not?
- What advice would you give to other organizations and individuals interested in replicating the successes of the Dialogue? And avoiding the disadvantages or failures?
