

Submission of proposals related to the Further revised draft text

- (e) The importance for threatened, endangered or declining species or habitats;
 - (f) Vulnerability, including to climate change and ocean acidification;
 - (g) Fragility;
 - (h) Sensitivity;
 - (i) Biological diversity;
 - ~~(i bis) Productivity;~~
 - ~~{(j) Representativeness;}~~ [\[move to network criteria\]](#)
 - (k) Dependency;
 - ~~{(l) Exceptional Naturalness;~~
 - (m) [Importance for ecological connectivity](#) ~~{and/or coherence}~~;
 - (n) Important ecological processes occurring therein;
 - (r) Slow recovery and resilience;
 - ~~{(q) Cumulative and transboundary impacts;}~~
-

- ~~{(o) Economic and social factors;}~~ ~~{~~
 - (p) Cultural [heritage factors](#);
 - ~~(p bis) Baseline for monitoring studies~~
 - ~~(p ter) Long term research studies~~
-

- ~~(m) Ecological connectivity and/or coherence;~~
- ~~(j) Representativeness;~~
- (s) Adequacy and viability;
- (t) Replication;
- ~~(u) Feasibility;~~

5. Rationale for the proposal, if any.

three categories: ; criteria; and
criteria. For Annex I, IUCN suggests adding a fourth set of criteria for
the design of representative networks of connected and ecologically coherent MPAs.

Regarding criterion for "Productivity": Suggest separating "productivity" from
"biodiversity" as areas with high productivity m iveiv
