Mission statement

The mission of the Caprinae Specialist Group is to assess the conservation status of all species in the suborder Caprinae, to identify those species that are threatened with extinction, and to develop and implement conservation action plans for those species. The Group also aims to raise awareness of the conservation needs of Caprinae species and to promote the conservation of their habitats and the ecosystems they inhabit.

Projected impact 2021–2025

The projected impact of the Caprinae Specialist Group's activities from 2021 to 2025 is to assess the conservation status of all species in the suborder Caprinae, to identify those species that are threatened with extinction, and to develop and implement conservation action plans for those species. The Group also aims to raise awareness of the conservation needs of Caprinae species and to promote the conservation of their habitats and the ecosystems they inhabit.

Targets 2021–2025

ASSESS

T-002 Assess the conservation status of all species in the suborder Caprinae, to identify those species that are threatened with extinction, and to develop and implement conservation action plans for those species.

ACT

T-005 Develop and implement conservation action plans for those species that are threatened with extinction.

COMMUNICATE

T-001 Produce the Caprinae News e-bulletin, Save Our Species newsletter, SSC Groups' newsletter editions produced.

Activities and results 2021

ACT

Synergy

T-005 Advise, collaborate and endorse: Result description: *Rupicapra pyrenaica parva* and *R. p. pyrenaica*.

COMMUNICATE

Communication

T-001 An overall view of all Caprinae: Result description: *Rupicapra pyrenaica parva* and *R. p. pyrenaica*.

T-003

Number of Species e-bulletin, Save Our Species newsletter, SSC Groups' newsletter editions produced: Result description: *Caprinae News*.
