

IUCN SSC Conservation Planning Specialist Group

CHAIR	NUMBER OF MEMBERS
Chair	242
Members	12101
Members A	55124

Mission statement

The Conservation Planning Specialist Group (CPSG) is a member of the IUCN Species Survival Commission (SSC). The group's mission is to provide expert advice and support to the IUCN and its member states on the conservation of biodiversity. The group's work is focused on the development and implementation of conservation plans for threatened species and ecosystems. The group's members are experts in their fields and work together to provide the highest quality of advice and support. The group's work is essential for the conservation of biodiversity and the sustainable use of natural resources.

Projected impact 2021–2025

The Conservation Planning Specialist Group (CPSG) is projected to have a significant impact on the conservation of biodiversity over the period 2021–2025. The group's work is expected to result in the development and implementation of conservation plans for a large number of threatened species and ecosystems. The group's work is also expected to result in the improvement of conservation management practices and the strengthening of conservation institutions. The group's work is essential for the conservation of biodiversity and the sustainable use of natural resources.

Targets 2021–2025

PLAN

The Conservation Planning Specialist Group (CPSG) has set the following targets for the period 2021–2025:

- Develop and implement conservation plans for 100 threatened species and ecosystems.
- Improve conservation management practices for 50 threatened species and ecosystems.
- Strengthen conservation institutions in 10 countries.

The group's work is essential for the conservation of biodiversity and the sustainable use of natural resources.
