The University of Hong Kong, Hong Kong (retired)	National Oceanographic and Atmospheric Administration, National Marine Fisheries Service, California, US	

Mission Statement: To conserve and sustainably use the world's biological diversity, to ensure that species and ecosystems are resilient and able to continue to provide the goods and services upon which we all depend.

Policy

T-008 (KSR 9)

Number of spawning aggregations protected in WIO: 0

Result description: For this we contributed to the Western Central Atlantic Fishery Commission (WECAFC)/Food and Agriculture Organization (FAO) Fishery Management Plan which has been finalised for Nassau Grouper (*E. ...*) and Mutton Snapper (*L. ...*). The plan was reviewed and translated and has been formally assessed and accepted by WECAF's Scientific Advisory Group (FAO).
