

REGIONAL BRIEFING WEBINARS ON NATURE-BASED SOLUTIONS FOR IUCN MEMBERS

Virtual meeting

10th OCTOBER 2022 -11h00-12h30 (GMT+2)

Although there has been an unprecedented recognition of Nature-based Solutions (NbS) by a wide range of state and non-state actors in recent years, there is still resistance to its use among some state and non-state actors. A clearer recognition of NbS in decisions of the three Rio Conventions, building on the recent UNEA resolution, will not only help to ensure greater consistency across these key international policy processes but also provide a more robust operational framework to guide its implementation on the ground. A clearer reference to NbS would also give greater confidence to the many state and non-state actors who are already implementing them at scale, while allowing governments to have greater oversight and accountability of its use.
