

2025

Adopted

Use our acknowledged role as a key global knowledge-broker and standard setter for protected and conserved areas to support efforts to improve governance equity, sound

The WCPA will build on priorities from the 6th World Parks Congress and its Promise of Sydney to further explore and promote the linkages between healthy ecosystems and human health, especially exploring the linkages between protected areas, health and urban communities, including support for a One Health strategy for preventing future pandemics.

The WCPA will underpin its work across all programme areas with a strong capacity development programme to encourage and support new conservation leaders, including youth, and strong communication and outreach to demonstrate the relevance of protected areas to human welfare and well-being.
