

Mission statement

The mission of ASG is to promote the conservation of the world's antelope diversity and to contribute to the mission of SSC.

Projected impact for the 2017-2020 quadrennium

By the end of 2020, we expect that: the Antelope Specialist Group's (ASG) global framework for antelope conservation; road maps for all threatened taxa; action plans for key species; updated Red List assessments; advice to IUCN, CITES, CMS, governments and INGOs; support for project proposals; and dissemination of information will collectively have made a significant contribution to stabilising and/or improving the status of antelopes and also to specific targets on the SSC Strategic Plan.

Targets for the 2017-2020 quadrennium

Assess

Green List: complete Green List assessments for 93 species.

Red List: (1) maintain regular updates of 93 species' Red List datasheets; (2) complete all (144) Red List reassessments.

Research activities: (1) enter baseline data for all

i. An assessment update file for each species (total number of species 93) has been created. New data are added to the appropriate sections using track changes when they become available. (KSR #11)

i. Information on species and subspecies from the African Antelope Database (East 1999) and Mammals of Africa Vol 6 (Kingdon & Hoffman 2013) entered into Antelope e-database.

Plan

i. Development of the Global Antelope Strategy
