Mission
The mission of the Caucasus Plant Red List Authority (RLA) is to contribute to increasing knowledge (particularly with the criteria B and C), which will be possible after ecosystem Red Listing, will enable decision makers to properly determine effective measures for in situ conservation of the mentioned pool of threatened plant species.

T-005 Identify threatened ecosystems and assess risk severity in the Caucasus.

T-006 Organise a Regional Workshop to further strengthen international cooperation within the RLA.

NETWORK

T-001 Enhance collaboration with relevant IUCN member specialists for advice on the Ecosystem Red Listing process.

Annual Report 2021

ASSESS

Assess plant species

T-002 (KSR 5)

Number of research projects completed or supported by SSC members per taxonomic group and region: ongoing

Result description: The Caucasian Flora Conspectus website (<https://www.binran.ru/resursy/informatsionnyye-resursy/tekuschie-proekty/caucasian-flora/>) was created and run by V.L. Komarov Botanical Institute of the Russian Academy of

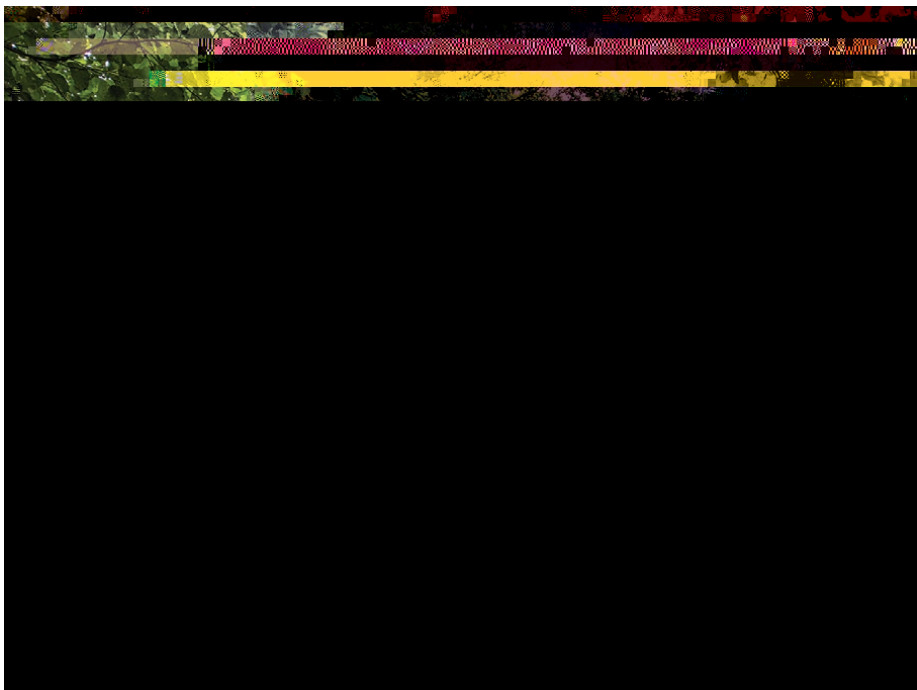

2021, 2025

ASSESS

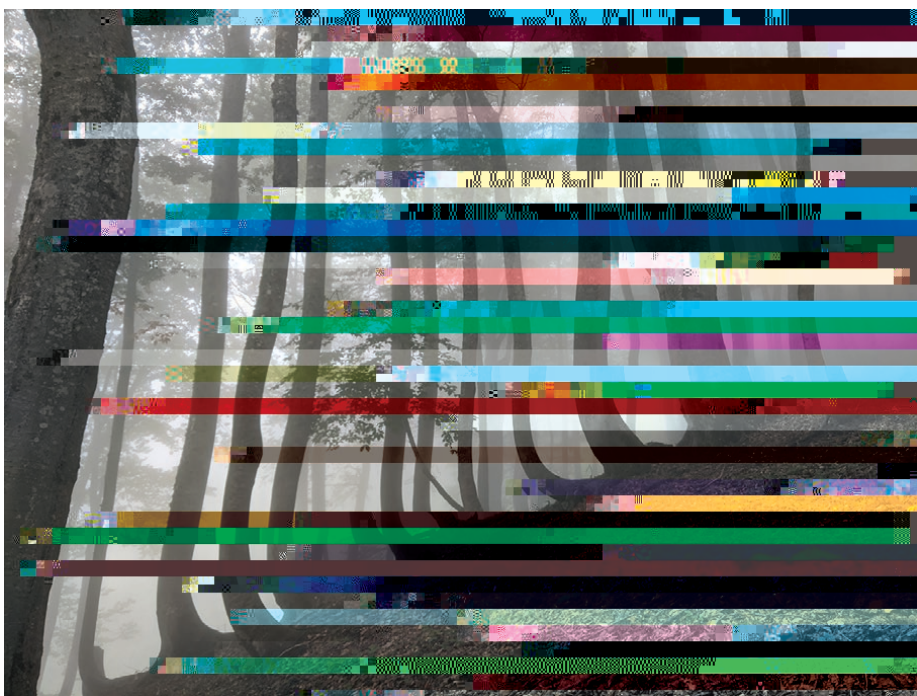

T-002 Complete the Caucasian Flora Conspectus and further develop its website.

T-003 Assess plant species based on field studies of rare plant populations.

T-004 Re-assess plant species based on field studies of rare plant populations.
