Message

The Goose Specialist Group (GSG) seeks to strengthen contacts between all researchers of migratory goose populations in the Northern Hemisphere by organising regular scientific conferences, and stimulating research on the dynamics of geese populations.

Proposed action 2017-2020

By the end of 2020, we will make a revision of current IUCN Red List status of goose species of concern in Europe. Addressing the conservation and management of d2.6 (n a.k.(c)(e)-1.16rd (0) 18. -2.4 L4pp) 18. -2.4 11.1 (20. (0)-) .-5y(AEWA), as call through Resolution 6.14. By the end of 2020, we expect acceptance of the Platform in most

Activities

Activities

Research activities

. The review of the abundance, status and distribution of 68 natural wild geese populations in the Northern Hemisphere was published and can be downloaded here: <https://www.caff.is/assessment-series/all-assessment-documents/458-a-global-audit-of-the-status-and-trends-of-arctic-and-northern-hemisphere-geese>. (KSR #12)

Conferences

Scientific meetings

. The 18th conference of the Goose Specialist Group was held in March 2018 in Lithuania, where the main results of population assessments were reported. (KSR #28)

Acknowledgements

We thank Anthony D. Fox and James O. Leafloor and all of the authors of the population profiles for collating their text and present data on each
