

The IUCN Species Conservation Committee (SSC) is a committee of experts in the field of conservation biology. It provides advice to the IUCN on the status of species and on the conservation of biodiversity. The SSC is composed of experts from a wide range of countries and disciplines. It meets regularly to discuss the status of species and to provide recommendations to the IUCN. The SSC is a key part of the IUCN's conservation efforts.

Members of the SSC are elected by the IUCN Council. The SSC is currently composed of 100 members from 100 countries. The SSC is currently working on a number of projects, including the development of a global conservation strategy and the implementation of a global conservation plan. The SSC is also working on a number of other projects, including the development of a global conservation database and the implementation of a global conservation network.

The SSC is currently working on a number of projects, including the development of a global conservation strategy and the implementation of a global conservation plan. The SSC is also working on a number of other projects, including the development of a global conservation database and the implementation of a global conservation network. The SSC is currently working on a number of other projects, including the development of a global conservation strategy and the implementation of a global conservation plan.

ASSESS: Update the data on the status of species and on the conservation of biodiversity.

PLAN: Develop a global conservation strategy and implement a global conservation plan. Develop a global conservation database and implement a global conservation network.

ACT: Carry out the conservation strategy and plan. Implement the conservation database and network.

The SSC is currently working on a number of projects, including the development of a global conservation strategy and the implementation of a global conservation plan.

NETWORK: Establish a global conservation network of experts and organizations. Develop a global conservation database and implement a global conservation network.

COMMUNICATE: Develop a global conservation strategy and implement a global conservation plan. Develop a global conservation database and implement a global conservation network.

2022 Report

IUCN SSC Post-2020 Biodiversity Targets Task Force

CHAIR	PROGRAMME OFFICER	NUMBER OF MEMBERS
Dr. Ne ca_eUieXi , UK	A... .. Ne ca_eUieXi , UK	23

Mission statement

The IUCN SSC Post-2020 Biodiversity Targets Task Force will provide a framework and leadership to species experts in the field of the Post-2020 Strategic Plan for Biodiversity, the Paris Agreement, the Convention on Biological Diversity (CBD), and the Sustainable Development Goals. The Task Force will lead high-level strategic advice and coordinate the work of the SSC experts and guide the development of technical policies and actions to address the loss of biodiversity and ecosystem services.
