

To accomplish those targets, the Species Conservation Cycle was established, which is the conceptual framework for the Network activities. The Species Conservation Cycle's main purpose is to guide efforts for valuing and conserving biodiversity through three essential components that are linked to each other:

ASSESS: Understand and inform the world about the status and trends of biodiversity. **PLAN:** Develop collaborative, inclusive and science-based conservation strategies, plans and policies.

ACT: Convene and mobilise conservation actions to improve the status of biodiversity.

Their implementation requires two transversal components:

NETWORK: Enhance and support our immediate network and alliances to achieve our biodiversity targets.

COMMtty⊠

Stand-alone reports summarize the activities conducted and results generated by each group member of the SSC. Following, is the structure of the stand-alone report and the contents under each session.

Mission statement

Not stated yet.

Projected impact 2021–2025

This is a newly formed group whose initial aims were set around gathering relevant specialists, understanding the process for SSC specialist group formation, and implementing it, all of which were achieved successfully.

Targets 2021–2025

ACT

T-004 Development of multimedia packs for educational purposes. Status: Not initiated T-005 Connect with professionals from the agropastoral world. Status: On track
