

ISSUE 63

2022 Report of the IUCN Species Survival Commission and Secretariat

The IUCN Species Action Plan (SSAP) is a science-based framework for the development of species action plans. It provides a common structure and terminology for the development of species action plans. The SSAP is a framework for the development of species action plans. It provides a common structure and terminology for the development of species action plans. The SSAP is a framework for the development of species action plans. It provides a common structure and terminology for the development of species action plans.

The Species Action Plan (SSAP) is a framework for the development of species action plans. It provides a common structure and terminology for the development of species action plans. The SSAP is a framework for the development of species action plans. It provides a common structure and terminology for the development of species action plans. The SSAP is a framework for the development of species action plans. It provides a common structure and terminology for the development of species action plans.

ASSESS: Undertake an assessment of the current status of the species and the threats to its survival. **PLAN:** Develop a species action plan that addresses the threats to the species and sets out the actions to be taken to conserve the species. **ACT:** Implement the species action plan and monitor the progress of the actions.

The implementation of the species action plan should be a continuous process. It should be reviewed and updated as necessary. **NETWORK:** Establish a network of stakeholders who are involved in the conservation of the species. **COMMUNICATE:** Communicate the progress of the species action plan to the public and other stakeholders.

Standardize the committee activities -
i.e. conduct and evaluate each
activity. Each member of the SSC. Fill in,
the committee and the chair and
the members of each committee.
