Consultancy for " for

Module 3: Long-term ecological knowledge: managing and updating national wetland inventories.

More information on the proposed support mechanism for completion of national wetland inventory is provided in [SC63 Doc.10](#) and in [SC63 inf.2](#).

## **2. THE CONSULTANCY SERVICES**

The Earth observation and wetland Expert will provide earth observation and wetland expertise within the consultancy team. She/He will particularly:

- 1.** lead the development and organisation of Module 1 and Module 2 training courses and associated training material, in English.
- 2.** contribute to the elaboration of two guidance documents related to, respectively, NWI structured process and Core elements of NWI.
- 3.** contribute to the organisation of the consultation process while developing the two guidance materials and the training material

The Earth observation and wetland Expert will participate physically to the training course, Module 1 in Seochon, South Korea, from 9 to 13 September 2024.

- One-week training material for training course Module 1 (PPTs, course structure and organisation).
  - Support to the design of video training material built upon the training course sessions.
- 
- Contribution to the drafting of the 'NWI structured process' guidance document.
  - Contribution to the drafting the 'Core elements of NWI' guidance document.
  - Contribution to the organisation of consultation processes with STRP members, Convention's partner organisations, including the organisations with some institutional arrangements with the Convention in the field
