

2.1		Proven ability to engage with a variety of stakeholders and capture the diverse perspectives of Ministers, policy makers, business leaders, trade associations, NGOs, local communities, indigenous peoples, (15%)	
2.2		Good knowledge of the social and environmental responsibility of companies at the national and regional level (10%)	
2.3		Proven experience and capabilities in facilitating multi-stakeholder processes (15%)	
3	Experts/ Subject matter experts:		35%
3.1		Advanced degree on public policy analysis particularly in the agriculture, fishing, and extractive industry. (15%)	
3.2		10 years of experience in policy analysis in the targeted economic sectors and in designing recommendations to decision-makers. (10%)	
3.3		At least 5 years of experience in support and advice in integrating biodiversity conservation and sustainability into sectoral policies and/or business strategies and investments. (10%)	
TOT	AL .		100%

4.5. Financial Proposal

4.5.1. The Financial

withholding taxes and similar. It is your responsibility to determine whether such taxes apply to your organisation and to include them in your Financial Proposal.

4.5.3. Applicable Goods and Services Taxes

Proposal rates and prices shall be exclusive of Value Added Tax.

4.5.4. Currency of proposed rates and prices

All rates and prices submitted by Proposers shall be in [MZN].

4.5.5. Breakdown of rates and prices

For information only, the price needs to be broken down as follows:

7.2. In order to participate in this procurement, you must meet the following conditions:

Free of conflicts of interest

Registered on the relevant professional or trade register of the country in which you are established (or resident, if self-employed)

In full compliance with your obligations relating to payment of social security contributions and of all applicable taxes

Not been convicted of failing to comply with environmental regulatory requirements or other legal requirements relating to sustainability and environmental protection

Not bankrupt or being wound up

Never been guilty of an offence concerning your professional conduct

Not involved in fraud, corruption, a criminal organisation, money laundering, terrorism, or any other illegal activity.

- 7.3. You must complete and sign the Declaration of Undertaking (see Attachment 2).
- 7.4. If you are participating in this procurement as a member of a joint venture, or are using sub-contractors, submit a separate Declaration of Undertaking for each member of the joint venture and sub-contractor, and be clear in your Proposal which parts of the goods/services are provided by each partner or sub-contractor.
- 7.5. Each bidder shall submit only one Proposal, either individually or as a partner in a joint venture. In case of joint venture, one company shall not be allowed to participate in two different joint ventures in the same procurement nor shall a company be allowed to submit a Proposal both on its behalf and as part of a joint venture for the same procurement. A bidder who submits or participates in more than one Proposal (other than as a subcontractor or in cases of alternatives that have been permitted or requested) shall cause all the Proposals with the

9. COMPLAINTS PROCEDURE

If you have a complaint or concern regarding the propriety of how a competitive process is or has been executed, then please contact <u>procurement@iucn.org</u>. Such complaints or concerns will be treated as confidential and are not considered in breach of the above restrictions on communication (Section 2.1).

CONTRACT

They may, however, be amended by IUON to reflect particular requirements from the donor funding this particular procurement.

ABOUTIUON

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Headquartered in Switzerland, IUON Secretariat comprises around 1,000 staff with offices in more than 50 countries.

the knowledge, resources and reach of more than 1,300 Member organisations and some 10,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, rest well-being.

1. Context

Mozambique has committed from 1994 to the Convention on Biological Diversity (CBD) that envisions for 2050 a world living in harmony with nature. As part of the country's efforts to respond to the CBD through the new Global Biodiversity Framework agreed upon in the Kunming-Montreal Conference of Parts held in December 2022 the International Union for Conservation of Nature (IUCN) is supporting the Ministry of Land and Environment (MTA) through the National Directorate of Environment (DINAB) in the implementation of BIODEV2030 phase II project.

Biodiversity is a public good and its conservation is a public duty. This perspective is associated with a global shift in the approach to biodiversity conservation, in which it is considered an integral element of sustainable development, and not merely a

sustainable practices that could be used as a basis for negotiation to define these commitments. These analyses are available online on the project website.

- 2) for the development : decisions and voluntary commitments had to be the result of co-construction and inclusive multi-stakeholder dialogue. To this end, involving biodiversity and conservation experts, representatives of economic sectors and civil society organisations
- and representatives were set up or activated in the countries. Their aim was to take conservation issues out of the traditional realm of technical and scientific experts and turn them into issues shared by all stakeholders, including the economic sector ("mainstreaming"). These platforms should also enable national environment ministries and national focal points for the OBD to better steer the implementation of the objectives and targets of the Post-2020 Global Biodiversity Framework by sharing action plans. The dialogue phase aimed to prepare, organise and facilitate multi-stakeholder workshops to bring stakeholders to agree on voluntary sectoral commitments in favour of biodiversity, for the chosen sectors; then to support the integration of sectoral and the chosen sectors;

The results of phase 1 also varied from one country to another:

- The 16 countries involved in phase 1 have finalised the initial diagnosis of the threats and identified the priority economic sectors on which the in-depth diagnosis of the sectors and the dialogue on commitments will focus (see table below).
- In-depth sector analysis has been completed in all countries.
- A multi-stakeholder platform was set up or mobilised in each of the 16 countries, as a forum for debate and for sharing the results and orientations of the project. The composition of these platforms has evolved according to the choice of sectors for the dialogue phase.
- The majority of countries have engaged in dialogue to work on voluntary sectoral commitments. In most cases, this took the form of inter-sectoral workshops or workshops attended only by stakeholders in the sectors in question. Proposals for commitments were put forward and discussed in 14 countries¹ with private sector players (umbrella organisations, individual companies) and institutional players (sectoral ministries/institutions). The national level was favoured in the majority of countries; however, 3 countries conducted analyses and dialogue at regional level (see table below).
- The BIODEV2030 approach tested in these 16 pilot countries in phase 1 was presented at several key events to illustrate how biodiversity can be integrated into economic sectors (APAC in Kigali in July 2022, COP15 CBD in Montreal in December 2022, etc.). Links have been made with the targets of the Global Biodiversity Framework under negotiation at COP15. However, the content of the voluntary

Payment Schedule

The Timetable below summarises the chronological order of deliverables and indicates milestones at which IUCN will pay the Consultant.

Deliverable	Milestone payment
Delivery of the inception report 1st October 2024	20%
Submission and approval of the first draft of 3 sectoral policy	40%
briefs presentation with project SPO of final report/policy briefs	
to sectoral ministries	
Presentation of the policy briefs in the multistakeholder dialogue	40%
platforms and submission of approved final report
