

The George Rabb Award for Conservation Innovation

Wendy Foden

In recognition of her innovative, dynamic and thoughtful leadership of SSC's work on climate change, especially for breaking new boundaries in the use of traits-based analyses and the IUCN SSC Guidelines for Assessing Species' Vulnerability to Climate Change.

Lisa Dabek

In recognition of her outstanding leadership and innovation in the conservation of one of the most overlooked groups of mammal species, the amazing tree kangaroos, and her over three decade commitment to conservation and local people in Papua New Guinea.

A f'A]WUY`<c a Ubb

In recognition of his leadership on developing novel means to measure the impact and success of conservation on a global scale, as well as his inspirational leadership of the IUCN Red List Committee, and his growing influence as one of the most articulate advocates for species conservation.

8f DYbbm@Ub[\ Ua a Yf

In recognition of her exceptional leadership in developing a consistent and scientifically robust global standard for identifying important sites for the persistence of biodiversity, drawing together multiple different stakeholders and scientific disciplines.

Dr Robert Lacy

In recognition of his pioneering work in the development of Population and Habitat Viability Assessment as a practical conservation tool, and his exceptional leadership as Chair of the SSC Conservation Breeding Specialist Group.

Dr H. Resit Akçakaya

In recognition of his innovative work on how to handle uncertainty consistently in Red List Assessments, his leadership on the development of the Red List Guidelines and the Extinction Guidelines, and his chairing of the SSC Standards and Petitions Sub-Committee.
