2000

of his leadership in advocating the integration of the work of zoological parks into broader conservation programs, tirelessly arguing the responsibility of zoos in conserving nature in the wild, and his far-reaching impact on practical wildlife conservation.

Former Chair of the IUCN SSC Cat Specialist Group. In recognition of his wild cat species, particularly his leading role in tiger conservation worldwide, active and successful of the SSC.

Former Chair of the IUCN SSC Sustainable Use Specialist Group. In recognition of his many years of important and innovative work establishing "conservation with a human face", championing the sustainable use of wildlife and its

1999

the conservation dimension in the use of plant resources in Africa, particularly in the complex area of ethnoecology. This involves resource use by people and the consideration of both cultural and ecological factors in approaching issues such as land-use planning, non-timber plant resource harvesting, and collaborativemanagement.

1996

In recognition of his dedicated leadership and vision as SSC Chair. His vision and leadership aims to foster understanding of the complex dynamics

conservation organizations, zoo and aquariums and other public enterprises to work together toward a respectful and sustainable relationship with the natural world.

1994

Dr Caughey passed away before the award could be presented to him, it was

of experimental design, analyses and integrity. He was best known for his

practical and theoretical research on population dynamics, where much of his work pivoted on the ecological relationships between herbivores and their forage.

***Peter Scott Awards were presented posthumously to Ingerio Eduardo Aspiazu, Alwyn H. Gentry & Theodore A. Parker III. All three were killed in a plane crash in Ecuador in August 1993. The award was presented to the family and friends of each of the honorees.***

For his tireless dedication as a conservationist and in special recognition of his role in helping to make the dream of an Andean protected area network become reality.

For pioneering the rapid assessment technique, an approach to evaluating knowledge and alerted governments to the precarious state of some of their richest ecological treasures, and in recognition of a lifetime of unmatched
