IUCN CALL FOR PAPERS

Achieving deforestation-free commitments through forest landscape restoration

*Submit your proposal for a paper no later than February 5, 2017, 12 a.m. EST.
Click [here](#) to proceed.*

Background

Growing global population and affluence means there are increasing and multiple demands on forest and other ecosystems to produce commodities and provide ecosystems services. While the demands for production continue to grow, the restrictions on where and how we can produce and protect become equally more prevalent. Deforestation-free and z
