PART 2 THE REQUIREMENT

Background information

Climate change is increasing the frequency, intensity and magnitude of disasters, leading to a higher number of casualties as well as property and economic losses. Nature can provide cost-effective, no-regret solutions, which help increase community resilience beyond their capacity to absorb and recover from a single disaster, such as a flood or drought. The Western Balkan economies are among the most vulnerable with respect to climate

as on the ecosystem - human activities interactions in the study area and not just the site specific or ecosystem unit alone.

- 5. Options for net improvements**, identify biodiversity and ecosystem conservation outcomes, options

Methodology: The ecosystem approach is a strategy for the integrated management of land, water and living resources that promotes conservation and sustainable use in an equitable way. Application of the ecosystem approach will help to reach a balance of the three objec
