

International Bycatch Meeting

4th- 6th October 2022
Malaga, Spain

The “International Bycatch Meeting” demonstrates the current state-of-the-art in addressing bycatch worldwide, with particular emphasis on the needs and challenges associated with the implementation of bycatch programmes in different seas and fisheries.

It aims to share experiences on how bycatch data are collected, identify effective solutions towards reducing bycatch, define ways to replicate best practices and discuss future directions.
