October 2012

(www.iucn.org)

The mission of IUCN is to influence, encourage and assist societies throughout the world to conserve the integrity and diversity of nature and to ensure that the use of natural resources is equitable and ecologically sustainable. IUCN was founded in 1963 and is unique in bringing together states, government agencies and a diverse range of non-governmental organizations. IUCN has a membership of more than 1,000 organizations, as well as 10,000 individual scientists and experts structured in six Commissions. Together they form the world's largest network for nature conservation, responsible for, amongst others, the IUCN Red List of Threatened Species. Member organizations within a country or region often organize themselves into National or Regional Committees to facilitate the cooperation and help coordinate the work of IUCN.

(www.iucn.nl)

The IUCN National Committee of the Netherlands (IUCN N/) was founded in 1983 as a part of the Dutch member organizations of IUCN, and the Dutch members of the six Commissions. The IUCN N/ office is based in Amsterdam and employs almost thirty staff, making it the largest IUCN National Committee office. Since 1998, IUCN N/ has managed several important projects for NGOs in the South that work on the linkages between ecosystems and biodiversity management and the livelihoods of rural communities.

The views expressed in this report do not necessarily reflect those of IUCN or IUCN National Committee of the Netherlands.
