Protected areas are the backbone of biodiversity conservation.

most of you grasp an answer to the
most effective and enduring way for most
of us to learn. Protected areas—both
national parks and state parks—offer
opportunities for personal and family
enrichment that are far more powerful
than through books or lectures. The
National Park Service is a great resource
for information on protected areas.

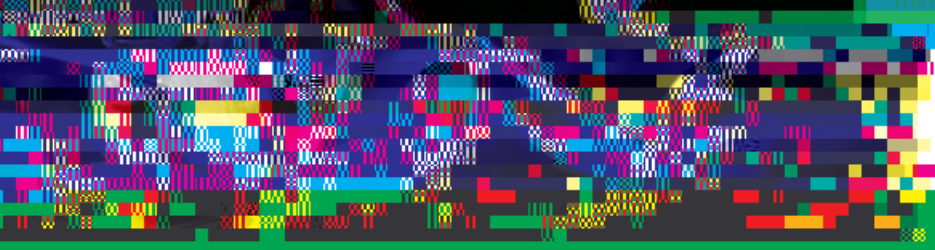

and hiking, cycling, canoeing, swim-

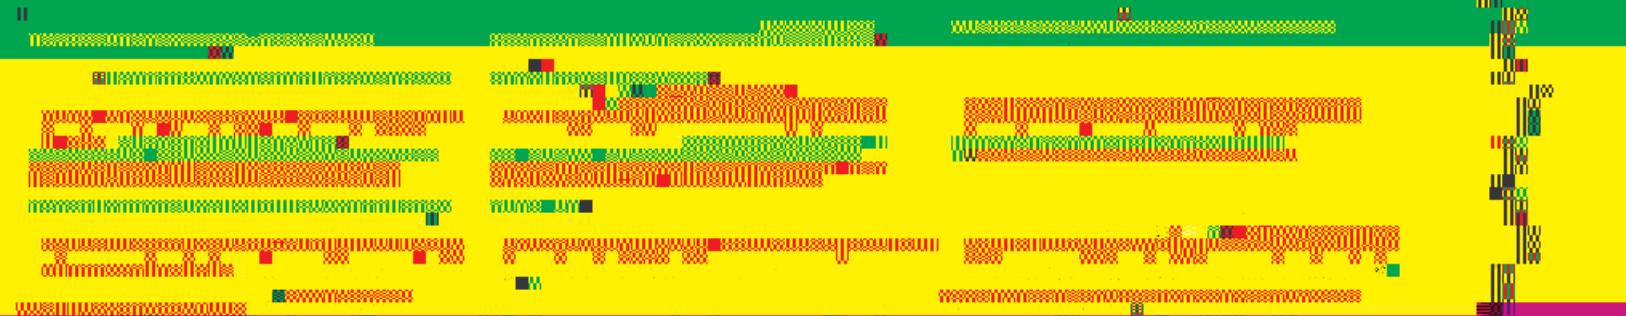

ing, snorkelling and mountaineering.
